This year the Economics and BAFS Department provided an opportunity to 20 S.4 students and 5 S.5 students to join a 4-hour personal finance workshop organized by the JA Personal Finance in April.

An experienced business volunteer was invited to share her experiences with the students on her own personal financial management. She led the students in sessions with group activities, real-life examples and practical tools. Students learnt essential skills such as budgeting, different payment methods and credit options. They were provided with the opportunity to discovering the value of savings and investments as well as getting familiar with some terminologies relating to the stock market. The workshop equipped students with the tools to make wise and responsible financial decisions throughout their careers and lives.

The students participated actively in the workshop and some of them even asked sensible financial questions. The volunteer had also commented that the students performed well which meant she enjoyed the time spent with them.
